Adrift in the Blue

General Description:

The worlds of the Wild Blue float in a sky of breathable gases circling a small, cold star. Scholars believe that the star is made from pure Essence—the strange energy that sorcerers channel for their magic. This “solar system” is much smaller than you might think—it takes about six weeks to cross from one side to the other on a standard sky ship. Most of the worlds of the Empire are so closely positioned that it takes only a day or two to travel from one to another.
